

Radiology Practice Opportunities

Join Northeastern Ontario's healthcare leader

Health Sciences North ([HSN](#)) is recruiting health care professionals who have a keen interest in effecting change within its dynamic health care system. As the tertiary care referral centre for the entire Northeastern Ontario region, HSN serves a catchment population of over 600,000 residents.

The Department of Medical Imaging at Health Sciences North is currently recruiting Radiologists with fellowship training, preferably in Diagnostic Neuroradiology, Musculoskeletal Imaging, Women's Imaging and/or Cardiothoracic Imaging. The Department offers flexibility in scheduling, a medically diverse environment, and an opportunity for great personal and professional growth.

The Medical Imaging Department at HSN uses state of the art equipment to perform both diagnostic and interventional procedures, allowing patients of Northeastern Ontario access closer to home.

Diagnostic Neuroradiology: HSN has a large neuroradiology practice with 15,000 brain, head & neck and spine CTs and 10,000 MRI performed each year on both our 1.5T and 3T Siemens VIDA scanners. HSN is a regional stroke center with an EVT program on site.

Women's Imaging: HSN is a tertiary breast screening centre inclusive of a high risk breast screening program, diagnostic assessments, and over 15,000 digital screening and diagnostic mammograms annually. As an OBSP High Risk site, HSN performs approximately 200 breast MRIs annually. We perform about 100 stereotactic and more than 300 US guided core biopsies per year. Moreover, HSN is a referral center for gynecological and obstetrics imaging for the North East LHIN with increasing numbers of pelvic MRIs. Our women's imaging MRI program is growing with the installation of our second MRI, and there is the opportunity to implement advanced fetal MRI.

Cardiothoracic Radiology: Each year, we perform 13,000 chest CTs, and more than 300 CT-guided lung biopsies. Cardiac CTs, CT coronary angiograms and Ca scoring are also performed on a routine basis, with increasing demand. Our cardiac MRI program is growing, with our current demand exceeding 200 cardiac MRI examinations performed annually at HSN.

Why choose HSN?

- Vast scope and broad spectrum of cases
- Dynamic team of over 600 credentialed medical staff
- Greater Sudbury is a natural paradise with activities to enjoy all year-round
- Attractive financial incentives for full-time practicing physicians

Candidates must be eligible for licensure in Ontario and have obtained or be eligible to obtain speciality qualifications from the Royal College of Physicians and Surgeons of Canada. Candidates eligible for restricted licensure and/or international applicants will be considered on a case-by-case basis.

The successful applicant will be expected to obtain academic appointment with NOSM-University ([NOSM-U](#)) and support the academic mandate of the Department of Medical Imaging. Research opportunities are also available through the Health Sciences North Research Institute ([HSNRI](#)).

If you are currently practicing or within one year of graduating, and are interested in opportunities in Sudbury, the Ministry of Health's [Community Assessment Visit Program](#) will cover travel and accommodation expenses for both you and your spouse to come explore our practice opportunity and the City of Greater Sudbury.

Come discover Sudbury's exceptional quality of life, abundant lakes, parklands and extensive recreational opportunities! Sudbury is a bilingual and multicultural community, and offers a variety of excellent elementary, secondary, and post-secondary education institutions. Physicians who practice fulltime in Sudbury are eligible for attractive financial incentives.

Interested individuals are invited to send a Letter of Interest and CV to the Medical Affairs Office: medcareers@hsnsudbury.ca HSN thanks all applicants, but only those selected for an interview will be contacted.
