

Interventional Cardiologist Career Opportunity

Join Northeastern Ontario's healthcare leader

Health Sciences North (HSN) is a leading tertiary academic health sciences centre serving Northeastern Ontario in partnership with NOSM University. As part of its established Regional Cardiac Program, HSN is seeking a **Cardiologist with fellowship training in Interventional Cardiology** to join the team.

This role supports the delivery of comprehensive, high-quality interventional cardiovascular care for patients across Northeastern Ontario. The successful candidate will join an experienced multidisciplinary team providing advanced cardiac services within a well-established regional program committed to maintaining and enhancing timely access to interventional cardiology care.

Clinical Responsibilities include:

- Inpatient and outpatient consultation and longitudinal follow-up of patients with coronary artery disease and other cardiovascular conditions
- Equal participation in the cardiology on-call rotation, including management of acute coronary syndromes and other cardiac emergencies
- Performance of diagnostic coronary angiography and percutaneous coronary intervention (PCI), including primary PCI for ST-elevation myocardial infarction (STEMI)
- Participation in the regional STEMI program and catheterization laboratory activities
- Collaboration with cardiac imaging, electrophysiology, cardiac surgery, vascular medicine, intensive care, emergency medicine, and regional referral partners to provide coordinated cardiovascular care
- Active involvement in quality improvement initiatives, clinical pathway development, and continued growth of the Regional Cardiac Program

Academic & Program Development:

- Teaching and academic engagement through NOSM University
- Eligibility for academic appointment and participation in undergraduate and postgraduate medical education
- Opportunities for clinical research and innovation through the HSN Research Institute

Qualifications:

- Board-certified Cardiologist with fellowship training in Interventional Cardiology and advanced experience in complex percutaneous coronary intervention (PCI)
- Eligibility for medical licensure in Ontario
- Demonstrated expertise in diagnostic coronary angiography and PCI, with experience in intravascular imaging (IVUS/OCT), coronary physiology assessment, mechanical circulatory support, and the management of complex coronary interventions

Health Sciences North
Horizon Santé-Nord

If you are currently practicing or within one year of graduating, and are interested in opportunities in Sudbury, the Ministry of Health's Community Assessment Visit Program will cover travel and accommodation expenses to come explore our practice opportunity and the City of Greater Sudbury.

Discover Sudbury's exceptional quality of life, abundant lakes, parklands, and extensive recreational opportunities. Sudbury is a bilingual and multicultural community and offers a variety of excellent elementary, secondary, and post-secondary educational institutions.

Financial incentives are available to physicians who practice full-time in Sudbury.

Interested individuals are invited to send a Letter of Interest and CV to the Medical Affairs Office at medcareers@hsnsudbury.ca.

HSN thanks all applicants; however, only those selected for an interview will be contacted.
